

Activity: Beyond Questioning

Purpose: Use a question log to take students beyond questioning to bring meaning to the text.

- Model for your students how this graphic organizer can be used to record their questions, reactions and reflections to bring meaning to the text.
- Have students use the question column to record questions they have before, during, and after reading.
- As students continue to read, have them record their reactions in the second column.
- The third column is for student reflections, connections, or any other thoughts that help bring meaning to the text. This graphic organizer helps lead students from questioning on to synthesizing.
